-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 29 December 2003.  
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.  
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Art Unit: 2653

The communication dated 12/29/2003 has been considered with the following results:

***Election/Restrictions***

Claims 6-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected claims, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 12/29/2003.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Awano et al. (US 5,388,954).

Awano et al., according to Figs. 1-7, shows an optical disk apparatus recording and/or reproducing a signal synchronously with a fine clock mark comprising all features of the claimed invention.

Regarding claim 1, see Figs. 1-7 which show an optical disk apparatus recording and/or reproducing a signal synchronously with a fine clock mark formed in advance on an optical disk (see disk 10 in Figs. 2, 3, 5 and 7), comprising: a sensor (see sensors 28 and 281) having first and second regions arranged along a track of the optical disk and detecting light reflected from the optical disk in each region; a subtracter (see subtracter 302) subtracting an output signal from the

Art Unit: 2653

second region from an output signal from the first region to detect the fine clock mark and generate a fine clock mark signal; an adder (see adder 301) adding the output signal from the first region to the output signal from the second region to generate a sum signal; and a defect remover (see PLL 39) setting level of the fine clock mark signal to zero when level of the sum signal is lower than a predetermined level.

#### ***Allowable Subject Matter***

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2-5 are allowable over the prior art of record because all cited references, considered as closest prior art and viewed in combination or individual, fails to suggest or fairly teach an optical disk apparatus including a combination of all features as particularly recited in claim 2. Claims 3-5 fall with their respective parent claim.

#### ***Cited References***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references relate to an apparatus for recording data to and/or reproducing data from a magneto-optical recording medium having clock marks recorded thereon.
